

Hands-On Robotics

EECS 498 Learning Robotics through Construction

Strongly encouraged for ALL majors and ALL levels (graduate, undergraduate) to register

Take Hands-On Robotics - a robotics course based on building robots using the CKBot modular robot system! Covering concepts in Robotics from kinematics, control, to programming, this class is a design course where students build robots through construction. Can be taken as a Flexible Technical Elective.

Monday, Wednesdays 12:00 - 2:00
